

FAGFORBUNDET

**Use your right
to vote
– choose better
welfare!**

What matters most to you when choosing who to vote for?

We all need safety and security, both at work and for our lives in general. We in Fagforbundet always use our vote because we want to ensure safety for our children, good welfare provision, and municipalities that can provide security for everyone as they grow older – regardless of our income levels or where they live. This is why we support those politicians who promise not to cut our public services, nor privatise welfare provision.

We encourage everyone to vote for politicians who will ensure:

- full-time, permanent employment opportunities
- healthy, nutritious food in schools and care homes
- that municipalities can continue to deliver public services

This will offer security: at work and for our lives in general, for everyone who lives and works here. The municipal and county elections take place on 9 September. You can cast your ballot from 10 August onwards, as part of the early voting provision.

Fagforbundet are voting – use your right to vote too!
